# MC 2 SPRAYERS

MC equals “maximum capacity” for your tractor’s CAT 2 3-Point. The NEW MC 2 Series Sprayer carries the fluid load closer to the rear of the tractor. That means more capacity, greater stability, and better performance on all terrains.

**More Capacity, More Boom Options, More Acres Covered!**

# PROSS105 SKID SPRAYER

What sets the PROSS105 apart is its innovative slide-out system, seamlessly integrating all controls and hose reel access along the siderail of the vehicle. This intelligent design facilitates effortless curbside utilization. The user-friendly placement of the electric start control and engine throttle is right next to the electric hose reel rewind button and the diaphragm pump control unit, ensuring ergonomic convenience. These strategically positioned controls allow the operator to effortlessly initiate the engine, fine-tune the RPM, and regulate pump pressure from the curbside, eliminating the need to navigate to the rear of the vehicle. For storage, simply disengage the lock pin, allowing the pump and hose reel to glide smoothly back over the tank. Notably, this unit's compact design occupies a mere 35 inches of bed space, making ample room for supplementary equipment and supplies.
