REAR BLADE T/F/A SERIES

T/LT Series blades are designed for tractors up to 55 hp. Choose between 4 to 8 feet wide moldboards.

NVHF Series blades are the ideal choice for up to 45 hp tractors. Choose between a 5 or 6 feet wide moldboard depending on your needs.

Ideal for light road maintenance, lawn care, gardening, and other light duty landscaping applications.

Offset, angle and tilt options come standard on all models.

End plates allow rear blade to hold in material for filling.

Skid shoes increase the life of the cutting edge and avoid damaging the working surface while cleaning corrals or plowing snow.

Blades can be used year-around for leveling ground, roadside clearing and snow removal.
