4C5 INDUSTRIAL BOX SCRAPER

THE 4C5 INDUSTRIAL BOX SCRAPER HAS A UNIQUE DESIGN THAT COMBINES THE RUG-GEDNESS AND STRENGTH OF THE 4C4 HEAVY FIXED BACK PLATE WITH THE CONTROL OF THE 4C2 WITH FLOATING TAILBOARD.

TAILBOARD IN FIXED POSITION

THE TAILBOARD CAN BE QUICKLY LOCKED INTO THE FIXED POSITION PROVIDING THE STRENGTH REQUIRED FOR RUGGED PROJECTS AND MOVING HEAVY MATERIAL. THE FIXED TAILBOARD IS VERY EFFECTIVE FOR BACK FILLING PROJECTS WHERE STRENGTH IN THE BACK PLATE IS IMPORTANT.

TAILBOARD IN FIXED POSITION

FLOATING TAILBOARD POSITION PREVENTS BUILD UP OF MATERIAL BETWEEN FRONT AND REAR CUTTING EDGES ALLOWING MATERIAL TO PASS THROUGH ENSURING A CONSTANT AND SMOOTH PULL. THIS PASS THROUGH ACTION REDUCES SIDE PLATE WEAR, OPERATOR FATIGUE AND PROJECT TIME. THE FLOATING TAILBOARD POSITION IS EXCELLENT FOR FINISHING WORK AND TOP DRESSING PROJECTS.

STANDARD BOX SCRAPER

WHEN QUALITY AND UTILITY ARE NEEDED, THIS IS THE SCRAPER MOST PREFERRED.
THIS DESIGN INSURES THE PROPER ANGLE OF ATTACK TO PROVIDE CORRECT MATERIAL
CURL WITH A SMOOTH EFFICIENT PULL. OUR UNIQUE SHANK POCKETS ELIMINATE SHANK
SLOT WEAR AND THE ALL WELDED DESIGN PROVIDES STRENGTH AND RELIABILITY.

FEATURES:

SHANKS HAVE FOUR HEIGHT SETTING WITH "L" PIN FOR QUICK ADJUSTMENT

THE MAIN BEAM IS SET HIGH TO PROVIDE A CLEAR UNOBSTRUCTED PULL THROUGH TO THE BACK PLATE

THE PLACEMENT OF THE SHANK BEHIND THE MAINBEAM ALLOWS FOR A CLOSER COUPLING OF THE SCRAPER TO THE TRACTOR FOR BETTER SCRAPER CONTROL AND ALSO ELIMINATES SHANKS HITTING TRACTOR TIRES

OUR SHANK POCKETS PROVIDE STRENGTH AND SUPPORT

OUR CONTOURED SIDE PLATES AND BACK PLATE DESIGN INSURES THE OPTIMAL ANGLE OF ATTACK TO INSURE A SMOOTH AND LEVEL PULL

OUR SIDE PLATES ARE EXTENDED BEYOND THE MOLDBOARD TO HELP CONTAIN SOIL WHEN "BACK-FILLING"

OUR SCRAPER IS A CLEAN MODERN DESIGN THAT JUST "LOOKS BETTER" ON TODAY'S MODERN TRACTORS.

OUR SCRAPERS ARE ALL WELDED CONSTRUCTION-NO ASSEMBLY IS REQUIRED

WE WILL PAINT TO MATCH MOST COMMON TRACTOR COLORS AT NO ADDITIONAL CHARGE!
