

AUGERS

OTHER AUGERS

The Market Transfer Auger is ideal for high moisture corn. It was originally designed to fill auger legs and blowers where tight fits are a problem.

The tube is a heavy gauge PVC with a polyethylene hopper.

The Market Transfer Auger is available in either a 6" or 8" diameter & in 10' or 12' lengths. Maximum discharge height is 50" for the 10' & 60" for the 12'.

The MARKET PORTABLE SINGLE AUGER SEED-FILL is available as a complete auger or you can purchase just the undercarriage to convert your existing 14' or 15' drill mounted unit over to a portable unit. Trading in your old no-till drill for a newer one? No problem. The undercarriage kit allows you to keep your fill auger for other uses as well as filling your new seed drill or planter.

The undercarriage kit can also be used to convert existing 14' or 15' MARKET PLASTIC GRAVITY BOX AUGERS over to a portable unit. You will need to purchase a vertical auger hopper and a telescoping downspout if required.

Our MARKET PLASTIC UTILITY AUGERS are custom built augers to suit your needs. Plastic is ideal for corrosive materials such as salt, waste or fertilizer.

Available in 6" & 8" diameters.

Electric or hydraulic drive kits. (Electric drive kits are less motor)

Available with plastic, cupped plastic and cupped steel flighting.

Various options include fill hoppers, wheeled under carriages, support channels & downspouts.
