"SERVING THE FARM INDUSTRY SINCE 1962"

18' SINGLE AUGER SEED-FILL

**New for the CIH 500T
& the NEW HOLLAND
2080P/2085P Disk Air
Drills.**

FEATURES:

- From transport position to filling position in 30 seconds.
- The lid is able to open so that seed levels can be checked, with the auger in transport position.
- The auger height in transport position is 13'. The same overall height of the 30' unit. **IMPORTANT FOR TRANSPORTING & STORAGE**
- By storing the auger down the centre, it maintains the overall transport width of the disk drill. **IMPORTANT FOR SAFETY DURING TRANSPORT**
- Available with cupped steel, bristle & 5" cupped plastic flighting.

"SERVING THE FARM INDUSTRY SINCE 1962"

18' SINGLE AUGER SEED-FILL CIH 1240/1245

FEATURES:

- From transport position to filling position in less than 30 seconds.
- The 3-stage telescoping downspout allows you to reach both seed boxes from a single loading position.
- Available with cupped steel, bristle & 5" cupped plastic flighting.
- The "SKYHOOK" allows one person to fill the Planter and control the gravity box flow.
- The "SKYHOOK" keeps the end of the downspout above the seed as it flows into the seed hoppers.

"SERVING THE FARM INDUSTRY SINCE 1962"

SKY HOOK

With 3 different adjustment areas for height, length & angle, the SKY HOOK can be mounted to suit most applications.

The SKY HOOK allows one person to fill the seed drill or planter and control the gravity box flow.

The SKY HOOK keeps the end of the downspout above the seed as it flows into your seed drill or planter.

The SKY HOOK will save time and costly repairs to flighting that may be damaged due to plugging, which can occur if the downspout is set down in the seed box.
