

Introducing the Naïo Product Line

Revolutionizing Precision and Sustainability in Agriculture

Elevate Your Farming with Naïo Technologies

Naïo robots are here to transform the way you manage your fields. From precise weeding to environmentally conscious farming, our state-of-the-art machines are designed to work smarter, not harder. Powered by advanced RTK GPS guidance, Naïo robots deliver unmatched precision while protecting crops and soil.

Whether you're managing vineyards, vegetable fields, or large-scale farming operations, Naïo robots will help you save on chemicals, reduce labor demands, and increase operational efficiency.

OZ

Ideal for vegetable & specialty crops production and work in high-tunnel greenhouses

ORIO

A powerful, versatile tool-carrier for larger-scale growers

TED

Autonomously straddles vineyards

JO

Autonomous crawler for narrow vines & nurseries

Why Choose Naïo Robots?

- **Precision Farming Simplified**

Naïo robots use RTK GPS guidance for unparalleled accuracy, allowing farmers to target weeds efficiently without damaging crops.

- **Commitment to Sustainability**

100% electric, lightweight, and environmentally friendly, these robots support healthy, productive agriculture while reducing the environmental footprint.

- **User-Focused Safety**

Designed with safety in mind, Naïo robots ensure the protection of users, crops, and farm environments.

Backed by Edney Distributing

With over 70 years of expertise, Edney Distributing is proud to bring Naïo Technologies to North American farmers. Our network of 1,000+ reputable dealers ensures reliable access to cutting-edge agricultural equipment. From product selection to after-sales support, our team is here to help every step of the way. When you work with Edney, you're partnering with a team you trust, committed to your success.
