

WALLENSTEIN

MAKING WORK FEEL MORE LIKE PLAY™

MADE IN CANADA
FABRIQUÉ AU CANADA

5

YEAR WARRANTY
ANS DE GARANTIE

Designed for **Durability**, Trusted for **Generations**.

For over 40 years, Wallenstein has been building a legacy of Canadian craftsmanship. Our machines are engineered for the toughest jobs and built to last. It's a trust earned over generations by homeowners and professionals alike.

Real Wallenstein Experiences

Taken straight from our Google Reviews, check out what people have to say about their Wallenstein experience.

All it takes is owning one piece of Wallenstein Equipment to figure out these machines are built incredibly well. Not only are their products superior, they have fantastic aftersales support with any questions you may have.

-Chris S

Could not ask for a better service anywhere. My wood splitter is an older machine in fact around 26 years old, one phone call they were able to come up with a part for my old machine. Good work!!!

-Keith S

I've been using Wallenstein Equipment for years. The quality, durability, and performance are simply unmatched.

As a business owner in the firewood industry, uptime and reliability are everything. Wallenstein products are workhorses.

-Daniel C

Your Wallenstein, Your Color, Your Choice

Your equipment should be an extension of your hard work and style. We give you the power to choose from 7 color options and 2 Realtree Camo finishes, so you can customize your machine to match your equipment or personal brand. Our two-stage sandblasting and premium powder coating process provides a rugged, long-lasting finish that protects against tough jobs and the elements.

5 YEAR WARRANTY
ANS DE GARANTIE

Made in Wallenstein, ON

Canadian-Made. Over 40 Years of Proven Quality. Built to Last a Lifetime.

5 YEAR
RESIDENTIAL
WARRANTY

2 YEAR
COMMERCIAL
WARRANTY

We build our machines to last, and we back that claim with a solid guarantee. Every Wallenstein product comes with a 5-year residential warranty, providing long-term peace of mind with every purchase. This is our assurance of quality and a solid commitment to your machine's performance for years to come.

Wood Chippers

Wallenstein wood chippers are engineered to tackle your toughest brush and branches, turning overwhelming piles into valuable wood chips with ease. Built with robust components and designed for reliable performance, our range offers powerful solutions for homeowners, landscapers, and professionals alike.

Power Source Options

**Towable/
Self-Contained**

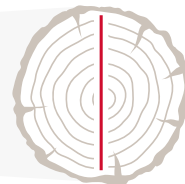

**3-Point Hitch/
PTO Driven**

**Skidsteer/
Hydraulic Driven**

Chipping Capacity Range

Feed Systems

Gravity Feed

Dual Hydraulic Roller Feed

Roller Speed Control

Manual

Automatic

Feed Systems

Gravity/Self Feed

The angled hopper uses gravity to effortlessly guide material into the chipping chamber, eliminating manual pushing.

Hydraulic Feed

Dual hydraulic motors power top and bottom rollers, providing a consistent grip and feed of brush.

Roller Speed Control

Hydraulic with Manual Flow Control

Adjust feed roller speed for varying wood types with an easy turn dial.

Hydraulic with Electronic Control (P3 Pulse System)

Monitors the rotor RPM and adjusts the hydraulic feed as needed to maximize productivity. Anti-jam technology.

Adjustable Exit Chute

Put the chips where you need them with an adjustable exit chute.

Wide Hopper

Easily handles large bulky brush.

Twig Breaker

Actively breaks down smaller branches and twigs, preventing clogs and ensuring more efficient material flow.

Wide Infeed Opening

Extra wide infeed opening handles large, irregular branches and limbs.

Precision Balanced Rotor

Reduces vibration, minimizes noise, and extends machine life.

Dual Action Hydraulic Rollers

Gripping your brush from top and bottom, delivering a consistent feed, powered by two hydraulic motors.

Angled Rotor System

Optimizes efficiency by positioning the log against the rotor, requiring less horsepower, reducing fuel consumption and minimizing machine wear.

Product features may vary by model.

MVP - Most Valuable Part Reversible Rotor Knives

The chippers are equipped with durable, reversible knives, extending their lifespan and maintaining cutting performance.

Chipper/Shredders

Wallenstein chipper-shredders are expertly engineered to transform brush, branches, and yard waste into nutrient-rich mulch or easily managed debris. Combining powerful chipping action for larger branches with efficient shredding for smaller materials, our machines deliver exceptional reduction ratios and reliable performance.

Power Source Options

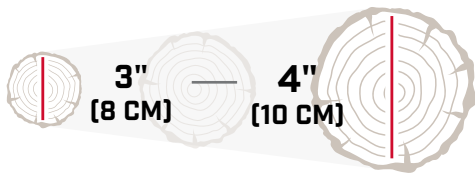

**Towable/
Self-Contained**

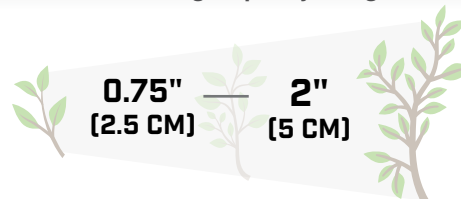

**3-Point Hitch/
PTO Driven**

Chipping Capacity Range

Shredding Capacity Range

Feed System

Gravity Feed

Adjustable Exit Chute

Put the chips where you need them with a 360° adjustable exit chute.

Shredding Hopper

Designed for smaller materials like twigs, leaves, and brush.

Chipping Hopper

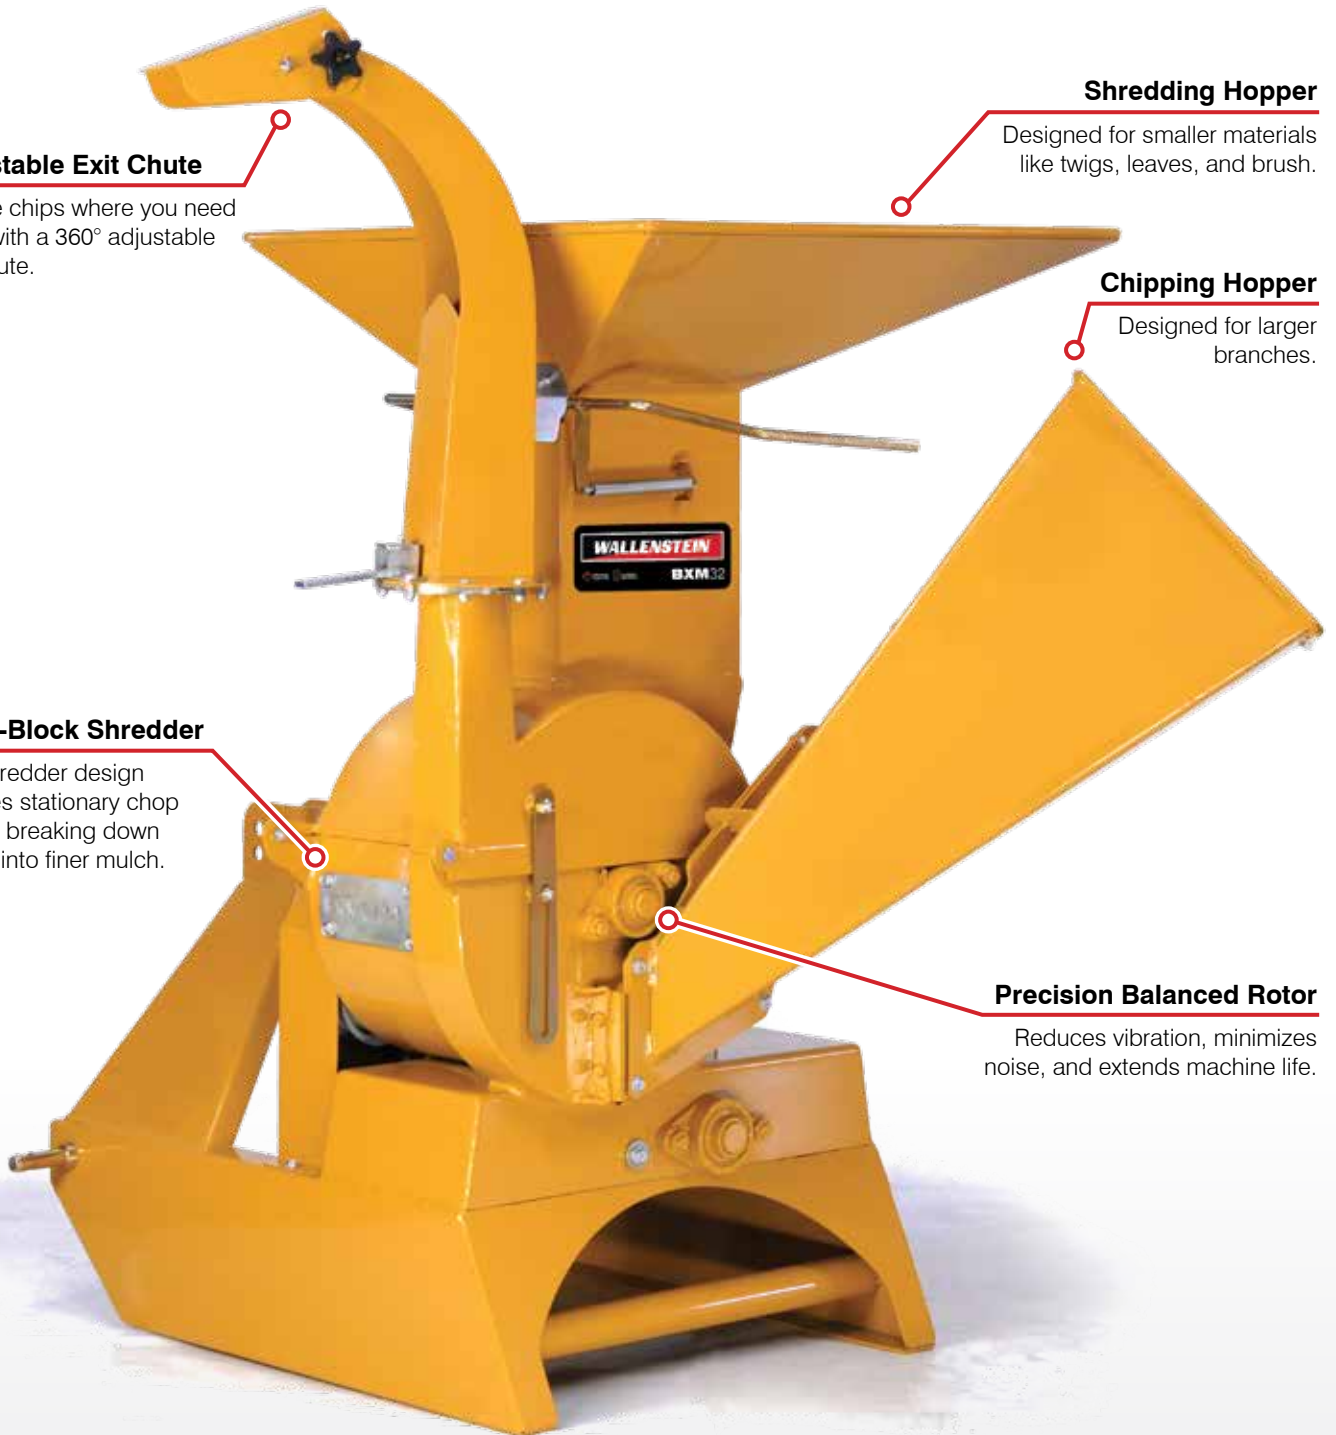

Designed for larger branches.

Chop-Block Shredder

Our shredder design features stationary chop points, breaking down debris into finer mulch.

Precision Balanced Rotor

Reduces vibration, minimizes noise, and extends machine life.

Product features may vary by model.

Dynamic Duo Shredder Knives & Reversible Rotor Knives

Keeps the shredder shredding and the chipper chipping

Log Splitters

Wallenstein log splitters are engineered to turn tough, unwieldy logs into manageable firewood with incredible efficiency and reliability. Built with robust frames and powerful hydraulics, our diverse range offers superior splitting force and speed, designed to meet the demands of homeowners, farmers, and seasoned professionals.

Power Source Options

**Towable/
Self-Contained**

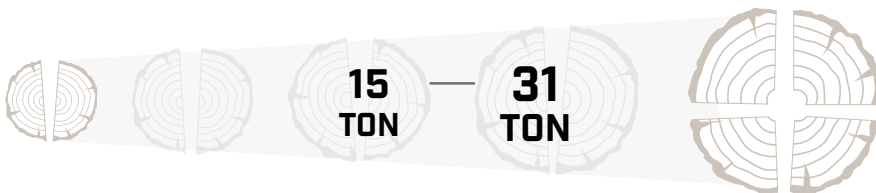

**3-Point Hitch/
Hydraulic Driven**

**Skidsteer/
Hydraulic Driven**

5 YEAR WARRANTY
ANS DE GARANTIE

Choosing the Right Tonnage

Wallenstein log splitters offer a range of splitting forces, from 15 to 31 tons, to effortlessly tackle various log types, including tough hardwoods.

**15
TON**

**Straight
(Bush)**

**31
TON**

**Cross Grain
(Fence Line)**

Various Orientations

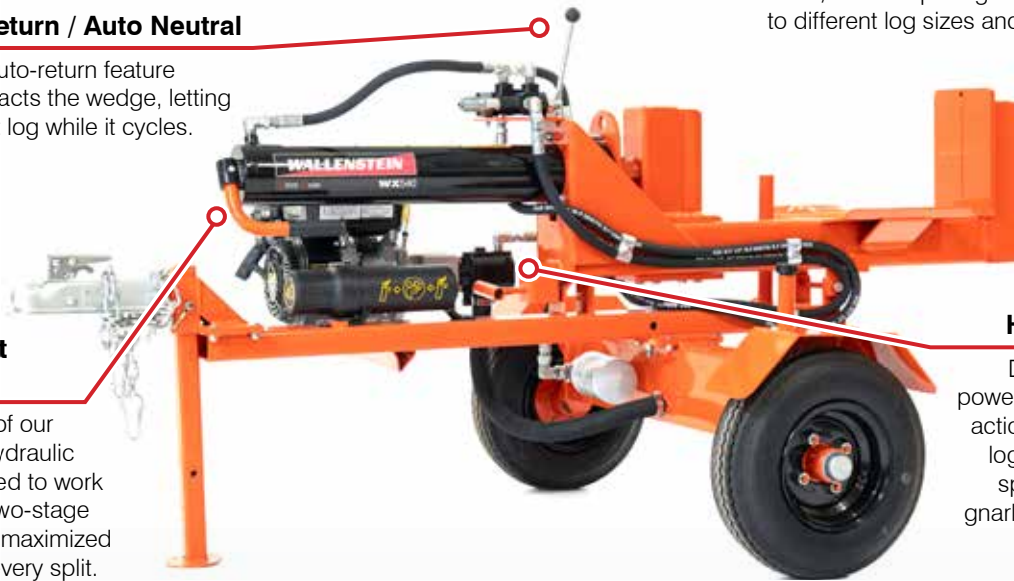

Available in horizontal, vertical, or a combination of horizontal/vertical splitting orientations to adapt to different log sizes and user preferences.

Hands-Free Return / Auto Neutral

Our hands-free auto-return feature automatically retracts the wedge, letting you grab the next log while it cycles.

Precision-Built Cylinder

The centerpiece of our perfectly tuned hydraulic system is designed to work in sync with our two-stage pump, delivering maximized throughput with every split.

Two Stage Hydraulic Pump

Delivers speed and power by providing swift action on straight grain logs and high-impact splitting force on the gnarliest, knottiest pieces.

Wedge Designs & Splitting Methods

Wide Wedge with Direct Pressure

Wide wedge spreads and pops the log in a short distance, reducing cycle time.

Two-Way Splitting Action

Splits the log on both the forward and backward stroke of the wedge, effectively doubling firewood production with each full cycle.

Product features may vary by model.

Double Your Efficiency Four-Way Wedge

This optional wedge splits a log into four pieces simultaneously with a single pass, dramatically increasing firewood output.

Firewood Processors

Designed to infeed, cut, split, and pile firewood in a single, streamlined process, minimizing manual handling and increasing efficiency. Offers 20 to 25 tons of substantial splitting power, effortlessly tackling various log types, including tough hardwoods.

Power Source Options

**Towable/
Self-Contained**

**3-Point Hitch/
Hydraulic Driven**

Infeed Options

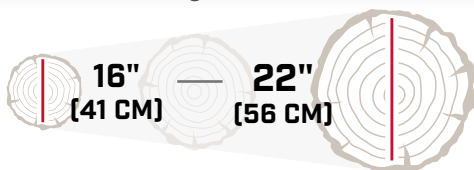

Winch Infeed

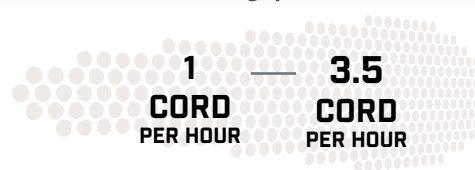

Live Deck Infeed

Log Diameter

Throughput

Hydraulic Saw

Cuts through logs with consistent pressure, delivering a fast, clean, and repeatable pass.

Infeed Conveyor with Hydraulic Clamp

Easily moves your log into the cutting chamber. The hydraulic roller assists in moving the log, which is then securely clamped into place for cutting.

Integrated Conveyor

This is a powered, active system that elevates and directs split firewood into higher piles, larger trucks, trailers, or into elevated storage solutions, enhancing versatility.

Hydraulically Adjustable Wedge

Hydraulically adjusted, allows you to easily set the wedge height to split different sized logs effectively.

Ergonomic Controls

Designed for easier, more comfortable reach and operation, reducing operator fatigue.

Folding Live Deck

Provides a convenient and efficient way to stage and feed multiple logs onto the in-feed conveyor for continuous processing.

Length Indicator

Ensures consistent firewood lengths for uniform stacking and burning.

Offload Chute

This is a static chute that directs split firewood into smaller trailers, truck beds, wagons, or bins, suitable for lower discharge heights.

Pivoting Chainsaw Holder

Securely holds your chainsaw for precise and safe cutting of logs to desired lengths.

Hydraulic Winch

Features a powerful hydraulic winch to effortlessly pull heavy logs onto the in-feed chute, significantly reducing physical strain.

Adjustable Wedge

Easily adjust the wedge height to split logs of different sizes.

Product features may vary by model.

Maximize Efficiency
Adjustable 4-Way & 6-Way Wedges
Split logs into six pieces with a single stroke.

Firewood Conveyors

Wallenstein firewood conveyors are engineered to dramatically reduce the labor and time involved in stacking, loading, or transporting your processed firewood. Designed for efficient, continuous operation, these robust machines effortlessly move split logs, ensuring a steady flow from processor to pile, truck, or woodshed.

Power Source Options

**Towable/
Self-Contained**

Trough Length Options

Pile Height

Angle Indicator

Easily know the best height to set up and operate at.

Wide Trough

Flared to handle the firewood being dropped into the conveyor.

Heavy-Duty Chain

A robust pintle chain that has 2" high serrated cleats that grip and move the heaviest of firewood.

Engine Driven

Ensures consistent power delivery to the conveyor chain.

90 Degree Tire Rotation

Allows the operator to move the conveyor when the pile is getting too high.

Product features may vary by model.

Skidding Winches

Wallenstein skidding winches are engineered to simplify the tough job of extracting logs from your woodlot, delivering powerful pulling force and precise control. Built with heavy-duty construction and designed for demanding forestry work, our winches offer superior capability and reliability for various log sizes and terrains.

Power Source

 **3-Point Hitch/
PTO Driven**

Pulling Capacity Options

**4000
LBS** — **14000
LBS**

Cable Options

 **Synthetic Rope**

 **Steel Cable**

Control Options

 **Manual Pull Rope**

 **Wireless Remote**

MADE IN CANADA
FABRIQUÉ AU CANADA

5 YEAR WARRANTY
ANS DE GARANTIE

Cable Options

Synthetic Rope

Lighter, easier to use alternative to steel; 200 ft (60 m) long.

Steel Cable

More durable cable; 165 ft (50 m) long.

Check out our Knowledge Base online for help choosing your cable.

Winch Drum Lock

Holds logs securely in place and stabilizes them while skidding.

Removable Clutch Assembly

Easy removal for simplified servicing and maintenance.

Shearbolt Protected Drivetrain Included

Move on from a power spike by simply replacing a single shear bolt.

Keyhole Sliders & Choker Chains

Sliders on cable with two choker chains for attaching multiple logs.

Anchor Blade/Skidding Plate

Large blade anchors winch, stabilizes tractor, and lifts log fronts to reduce drag.

Safety Screen

Shielding you and your tractor for added protection on the job

Control Options

Manual Pull Rope

Pull this rope to engage the winch's clutch, which then winches logs inward.

Wireless Remote

Wireless control up to 150 ft (45 m) for enhanced safety and flexibility on select models.

Tow Bar

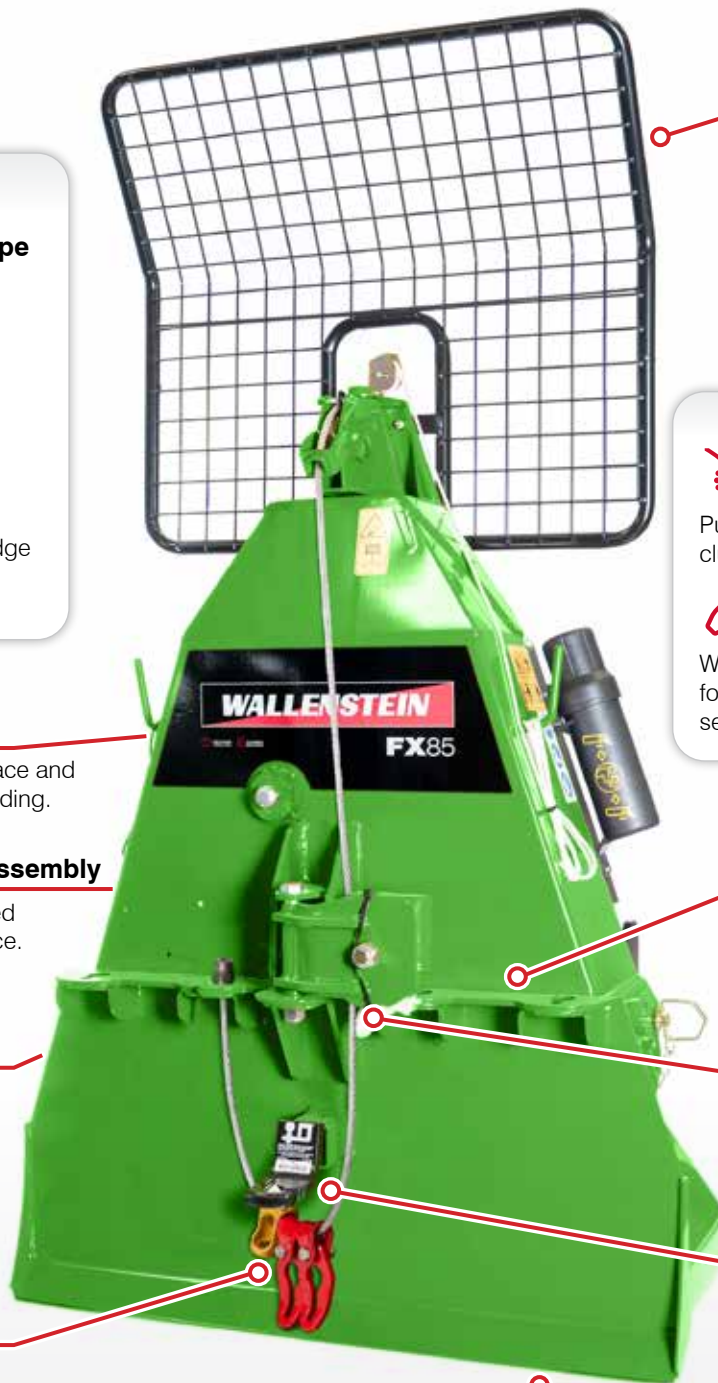

Features slots for organizing chains and allows skidding multiple logs or attaching a trailer.

Snatchblock Pulley System

Upper and lower pulleys optimize pulling angle, increase efficiency, and add blade down-pressure.

Trailer Hitch

Allows you to hook onto a trailer without detaching the winch.

Product features may vary by model.

A Helping Hand

Self Releasing Directional Pulley

Allows you to safely winch logs around corners, reducing damage to your logs. As the log approaches the pulley, it triggers a lever that automatically releases the cable from the pulley.

Push Bar

Control what is happening in front of you by forcing trees to fall away from your tractor or skidsteer.

360 Degree Hydraulic Rotator

Pick up logs in any position and move them exactly where you want with the 360 degree hydraulic rotator.

Bypass Grapple

Grapple tines fold together as tight as 3 inches, ensuring easy handling of smaller logs and branches

Cantilever Cradle

Leverage and secure your load with the serrated cradle when lifting logs in-line.

Product features may vary by model.

Optional Winch

Engineered to haul substantial volumes of logs, with capacities typically ranging from 5,000 lbs to 11,500 lbs.

270° Boom Rotation

Provides excellent reach and flexibility, letting you load from either side of the trailer and ensuring a safe operating zone.

5-Stick Control Panel

Features ergonomic and intuitive valve handles that easily swivel to either side of the trailer for comfortable boom and grapple operation.

Dedicated Power Pack

An engine-driven system that powers the hydraulics, making the entire unit completely independent of your tractor's hydraulics.

Self-Centering Bunk Posts

These posts naturally return to their upright position if bumped, ensuring logs remain securely loaded on the trailer.

Wide Grapple Opening

Easily handles a broad range of log diameters, typically from 3 to 40 inches.

360° Grapple Rotation

Offers precise log manipulation and positioning in any orientation.

Hydraulic Stabilizers

Individually controlled outriggers provide a wide, stable base, preventing tipping during heavy lifts.

High Ground Clearance

Allows the trailer to effectively navigate rough woodland terrain without getting hung up.

Walking Beam Axle

Individually controlled outriggers provide a wide, stable base, preventing tipping during heavy lifts.

Product features may vary by model.

Expand Your Options Expanded Metal Flat Bed

Convert your log trailer to a flatbed for more versatility.

Smooth Joystick Controls

Intuitive joystick controls, two-levers offer precise manipulation of all backhoe functions.

Comfortable Seating

Features a dedicated, ergonomic operator seat for comfortable use during extended digging sessions.

Dual Swing Cylinders

Providing balanced and powerful swing motion throughout the entire 180-degree arc, enhancing control and stability.

Greaseable Pins & Bushings

Strategic placement of easily accessible grease zerks at all critical pivot points allows for simple routine maintenance, reducing wear and tear on components and ensuring smooth operation.

Heavy-Duty Cylinders

Robust hydraulic cylinders handle demanding forces for long-term durability.

Hydraulic Stabilizer Legs

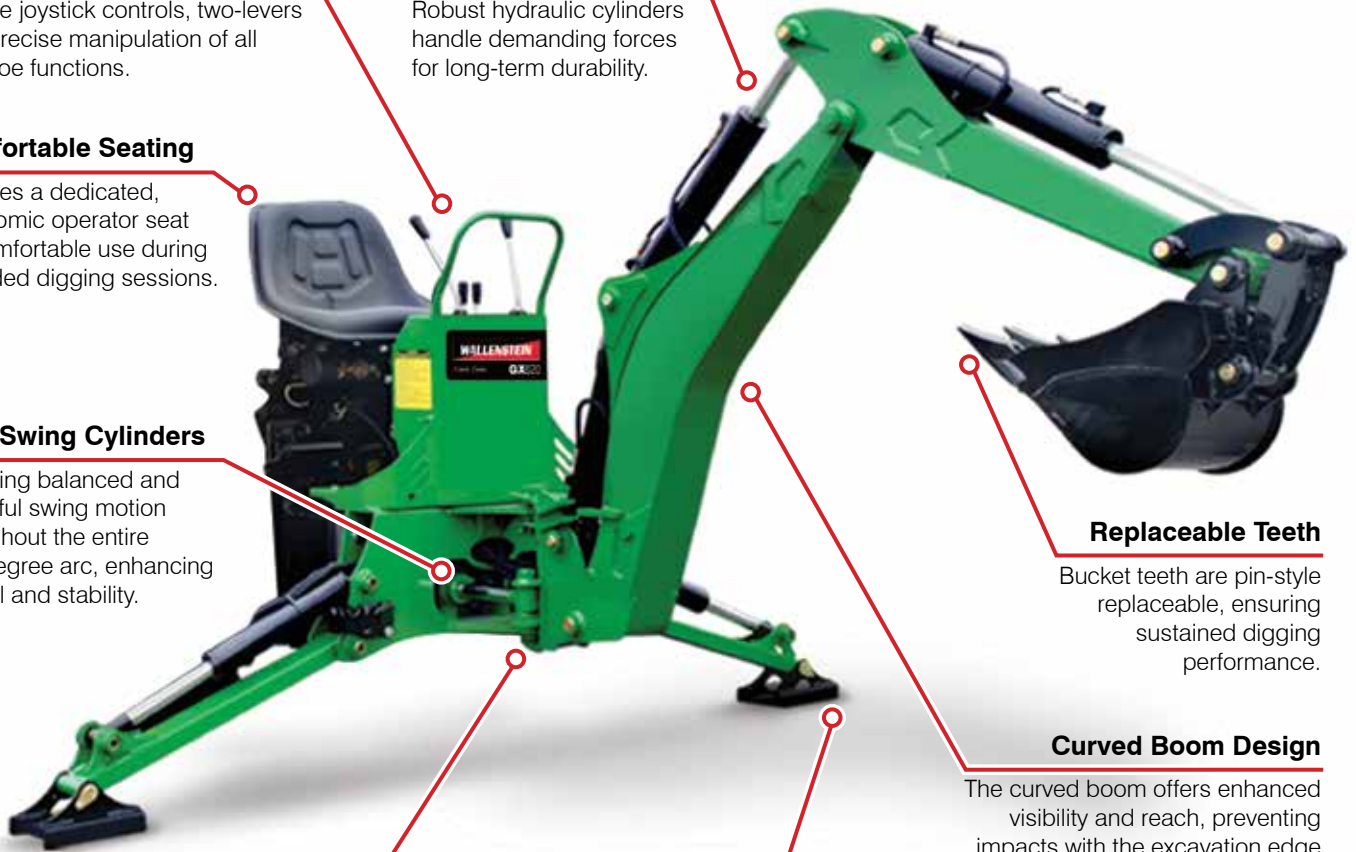

Hydraulically controlled stabilizer legs ensure a stable digging platform, preventing tractor movement during operation and enhancing safety.

Replaceable Teeth

Bucket teeth are pin-style replaceable, ensuring sustained digging performance.

Curved Boom Design

The curved boom offers enhanced visibility and reach, preventing impacts with the excavation edge and keeping dirt out of the trench.

Product features may vary by model.

Get a Grip

Mechanical & Hydraulic Thumbs

Easily grab and move all types of material with a Mechanical or Hydraulic Thumb added to your backhoe.

Manure Spreaders

Wallenstein manure spreaders are expertly engineered to efficiently return valuable nutrients to your fields and gardens, promoting healthy growth and maximizing yields. Designed for durable performance and consistent spreading, our machines handle various types of organic material with ease, ensuring an even distribution for optimal fertilization.

Power Source Options

Ground Drive

PTO Drive

Capacity (Heaped) Range

25
BUSHEL

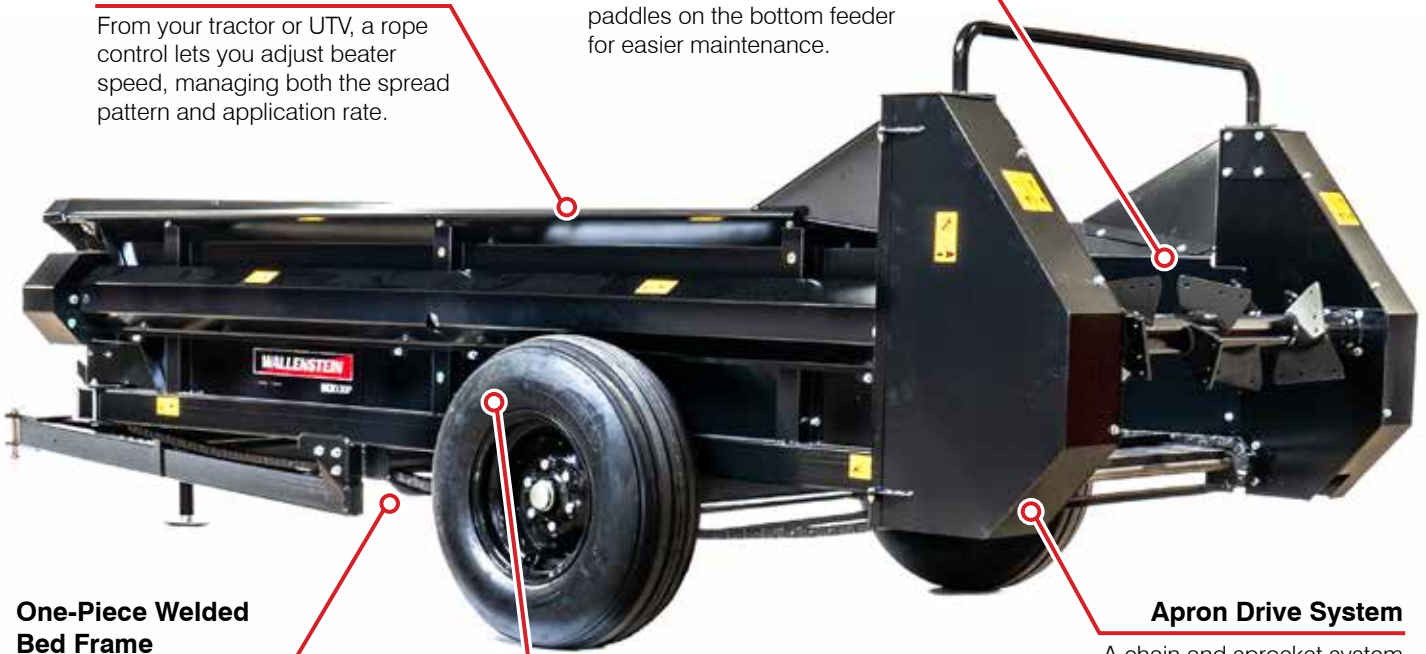

130
BUSHEL

Beater Paddles

Designed to shred material for a fine and consistent spread. The MX130P features replaceable paddles on the bottom feeder for easier maintenance.

Beater Speed Control

From your tractor or UTV, a rope control lets you adjust beater speed, managing both the spread pattern and application rate.

One-Piece Welded Bed Frame

This robust frame provides rigidity for the trailer tongue, axle assembly, and beaters, preventing premature wear and cracking of the box.

Easy Access Chain Tensioner

For quick and easy chain tension adjustment.

Apron Drive System

A chain and sprocket system ensures reliable, consistent manure movement.

Power Source Options

Ground Drive

These are ideal for use with smaller vehicles like ATVs, UTVs, or even lawn tractors, making them suitable for properties without PTO-equipped tractors. They rely on the traction of the tires to drive the spreading mechanism.

PTO Drive

Designed to connect directly to a tractor's PTO, offering efficient power transmission for consistent spreading, especially with larger capacities and heavier workloads.

Box Construction

Corrosion-Resistant Box

The box is constructed from corrosion-resistant carbon steel and is powder-coated for extra protection and longevity. The MX130P model features Cor-Ten weathering steel for its box side.

Rustproof Tongue & Groove Poly Floor Boards

The poly floorboards are easy to clean and designed to resist rust and rot, contributing to the spreader's long lifespan.

Product features may vary by model.

Complete Control Fines Pan

Prevent fine material from falling off the end, ensuring it is evenly distributed by the beater paddles.
